Chevalier 物業營運痛點分析

Chevalier: A Property Operations Pain Point Analysis

64個物業,各自一條電話線 —— 冇一個全局視野。

64 Properties, One Phone Line Each — No Portfolio-Wide View.

接近44,000個住宅單位分佈喺Kwong Yuen Estate、Grandview Garden等屋苑,各個site自己一套記錄方法,總部好難有實時SLA表現全貌。

With roughly 44,000 residential units spread across estates like Kwong Yuen Estate and Grandview Garden, each site logging calls its own way, head office lacks a real-time picture of SLA performance.

電話線各自為政 Dozens of Phone Lines

Chevalier每個屋苑都有自己嘅駐場電話線,維修來電靠紙張或者Excel人手記錄。

Each of Chevalier's estates runs its own on-site phone line, with maintenance calls logged on paper or spreadsheets.

冇全局SLA No Consolidated SLA View

總部有一個實時、跨越幾十個分散site嘅全局視野,睇唔到回應時間或者未完成工單。

Head office lacks a real-time, portfolio-wide picture of response times or outstanding work orders across dozens of dispersed sites.

夜間人手調配 After-Hours Manual Dispatch

水浸、困口、停電呢啲緊急事故,夜晚仲要靠值班主任逐個打電話搵有空嘅承辦商。

Urgent issues like water leakage, lift entrapment or power failure rely on a duty officer manually phoning around for an available contractor.

PMSA文件壓力 PMSA Documentation Load

PMSA更嚴格嘅採購同投訴處理守則(2025年7月生效),令每個site嘅文件記錄壓力越嚟越大。

Stricter PMSA codes of conduct on procurement and complaint handling (effective July 2025) add a growing documentation burden across every site.

全物業組合審核記錄

Portfolio-Wide Audit Trail

64個物業嘅每個來電同工單都自動加時間戳，等Chevalier維修團隊有齊一份符合PMSA嘅審核記錄。

Every call and work order across all 64 properties is timestamped automatically, giving Chevalier's maintenance team a single audit-ready record for PMSA compliance.

The screenshot displays the AI Call Centre interface. At the top, there are filters for 'AI Call Centre', 'All Properties', and 'All locations'. The main content is divided into three sections:

- Call History:** A list of calls with details like '電力' (Power), '梁小姐報修半島豪庭' (Ms. Leung reports maintenance for Peninsula House), and '用戶在19 San Fat' (User at 19 San Fat). Each entry includes a date, time, and status (e.g., 'Inquiry', 'Normal', 'Maintenance').
- AI Event Summary:** A summary of the current call event, including 'Event Type' (Power), 'Urgency' (Normal), 'Location Info' (位置待確認), 'Contact Info' (來電人: +85221147564), and 'Call Time' (12/06/2026 12:16:42). There is a '生成工單' (Generate Ticket) button.
- Detailed Description:** A text box containing the transcribed call content: 'The call was very brief with the agent stating that the call would be recorded to improve service quality before the user hung up immediately.'
- Call Record:** A section showing the call duration (00:00 / 00:05) and a 'Download' button. Below it, a timeline of the call shows the AI Operator's response at 12:16:42 and 12:16:49.
