六個地點得返一隊人手,重新開多間酒店變宿舍?

Six Sites, One Team, and a Hotel Turned Student Home.

由何文田本部去到紅磡新開嘅MU88宿舍,HKMU嘅設施管理團隊而家要照顧起碼五、六個唔同地方。

From the Ho Man Tin Main Campus to the newly acquired MU88 residence in Hung Hom, HKMU's Facilities Management team now coordinates at least five to six geographically separate sites.

版圖分散 Fragmented Footprint

本部、賽馬會校園、健康護理學院同埋校外教學場地,每個地方都各自有維修call。

Main Campus, Jockey Club Campus, the Institute of Healthcare, and satellite teaching space each generate their own maintenance calls.

新址零底子 New Site, No Infrastructure

紅磡MU88由前酒店改建,255個房,完全冇現成設施管理系統可以用。

MU88, the 255-room former hotel in Hung Hom, has no legacy facilities system of its own.

發展工程分心 Capital Projects Compete for Attention

同一班人要一邊處理日常派工,一邊仲要跟大型發展工程。

The same team running day-to-day dispatch is also actively delivering large capital development projects.

冇統一分流 No Unified Triage

有一個統一嘅接聽系統,六個地方嘅日常call好可能各處理各嘅,標準唔一致。

Without one intake layer, routine calls across six sites likely get handled site by site, inconsistently.

Cross-Site Compliance Record

六個地點(包括新收購嘅MU88)嘅每張工單都有時間戳記同SLA紀錄,隨時應付審核。

Every work order across all six sites — including the newly acquired MU88 — is logged with a timestamped SLA trail for audit-ready reporting.

The screenshot displays the AI Call Centre interface. At the top, there are filters for 'AI Call Centre', 'All Properties', and 'All locations'. The main content is divided into three sections:

- Call History:** A list of calls with details like '電力' (Power), '梁小姐報修半島豪庭' (Ms. Leung reports maintenance for Peninsula House), and '用戶在19 San Fat' (User at 19 San Fat). Each entry includes a date, time, and status (e.g., 'Inquiry', 'Normal', 'Maintenance').
- AI Event Summary:** A summary of the current call event, including 'Event Type' (Power), 'Urgency' (Normal), 'Location Info' (位置待確認), 'Contact Info' (來電人: +85221147564), and 'Call Time' (12/06/2026 12:16:42). There is a '生成工單' (Generate Ticket) button.
- Detailed Description:** A text box containing the call transcript: 'The call was very brief with the agent stating that the call would be recorded to improve service quality before the user hung up immediately.'
- Call Record:** A section showing the call duration (00:00 / 00:05) and a 'Download' button. Below it, a timeline shows the call progress with timestamps and agent actions.
